SUMMARY

Motivated and dynamic computer science student with a strong interest in web development and emerging technologies. Serious, curious, and self-driven, I am seeking an internship to apply and expand my technical skills (HTML, CSS, JavaScript, React, Node.js) in a stimulating professional environment. Work well under pressure and demonstrate strong problem-solving and troubleshooting abilities when facing complex development challenges. Known for excellent communication skills, both in collaborative teamwork and presenting technical

WORK EXPERIENCE

Backend Development Intern — Unimed

www.unimed.com.tn
Sousse, Tunisie | Jul 2025

- Developed backend features using Node.js, Express, and MongoDB in line with modern software design principles.
- Improved data handling performance by 40% by implementing efficient ORM techniques with Mongoose in a Node.js project.
- Contributed to an Agile development environment, actively participating in daily standup meetings and sprint planning

Robotics Club Member (Collaboration with ARIJ Company)

Sousse, Tunisie | Jun 2024 – Aug2024

- Participated in designing and programming educational robots using Arduino and various sensors
- Collaborated with ARIJ Company to lead educational workshops for children aged 5 to 12.
- Conducted hands-on activities in kindergartens using tools like LEGO WeDo 2.0, Scratch, and Micro:bit.
- Worked as part of a team to develop interactive and age-appropriate tech projects.
- Demonstrated strong communication skills, problem-solving, and troubleshooting in engaging with children and adapting content.

ACADEMIC PROJECTS

University Final Year Project — Fullstack Development (Frontend Lead)

Sousse, Tunisie | Mar 2025 – May 2025

- Led frontend development using Angular, creating responsive and user friendly interfaces
- Utilized GitHub for version control and contributed to team coordination through Agile tools like Trello.
- Demonstrated leadership, coding skills, and efficient problem-solving throughout the project lifecycle.

E-Learning Platform Website

Sousse, Tunisia | May 2025

- Developed a responsive e-learning platform for course delivery, enabling over 50 students to access materials online, submit assignments, and receive feedback in real time. The platform includes user registration, course listings, and a contact form.
- Technologies: HTML, CSS, JavaScript, PHP, MySQL

Mini Project – Student and Library Management System

Sousse, Tunisia | apr 2025

- Built an advanced desktop application to manage student records and library resources. The interface allows adding, editing, and tracking students, books, and borrow/return activities.
- Technologies: Java (Swing), JDBC, MySQL

Artificial Intelligence Projects

Sousse, Tunisia | Jan 2025 - May 2025

- Built during practical lab sessions as part of the AI course

Mobile Development – Practical Work

Sousse, Tunisia | Jan 2025 - May 2025

- Completed several hands-on lab sessions focused on mobile app development using Android Studio and modern technologies.
