- Resolved backend performance issues, improving API response time by 40%.
- Led a 4-person Agile team to deliver a full-stack web project on time.
- Reduced bug rate by 25% thorough code reviews and systematic testing
- Teamwork and collaboration
- Acquired Node.js in three weeks and applied it to develop backend features during internship.

LANGUAGES

SUMMARY

- Full-stack developer student with hands-on experience in building and deploying scalable web applications using JavaScript, React, Angular, Node.js, PHP, and Java. Skilled in database design, API development, and Agile practices. Passionate about creating efficient, user-friendly solutions. Seeking a PFE internship to apply technical expertise and deliver impactful results in real-world projects

EDUCATION

- Bachelor's Degree in Computer Science and Multimedia Expected Jun 2026
Higher Institute of Computer Science and Communication Technologies of Sousse (ISITCom)
- Technical Baccalaureate Jun 2023
Secondary School of Kalaa Kebira, Sousse

WORK EXPERIENCE

- Backend Development Intern — Unimed (1 month) Jul 2025
www.unimed.com.tn
Sousse, Tunisia
 - Built an internal Employee Performance Review Hub using Node.js, Express, and MongoDB, integrating JWT authentication, Google sign-in, and SMS verification for secure access..
 - Increased data performance efficiency by 40% through optimized ORM techniques with Mongoose.
 - Collaborated in an Agile environment, participating in daily stand-ups and sprint planning.
- Robotics Club Member — Collaboration with ARIJ Jun 2024 – Aug2024
Company
Sousse, Tunisia
 - Designed and built 5 educational robots and led 10+ workshops for 30+ children (ages 5–12) using Arduino, LEGO WeDo 2.0, Scratch, and Microbit.
 - Mentored children in robotics and technical concepts, enhancing their understanding, teamwork, and communication skills
- University Final Year Project — Full Stack Developer (Frontend Lead) Mar 2025 – May 2025
Sousse, Tunisia
 - Led frontend development of a hospital blood donation management platform using Angular and responsive UI design .
 - Collaborated with a 4-person Agile team using GitHub for version control and sprint tracking
 - Reduced project delays by 20% through proactive issue resolution and efficient task managemen

ACADEMIC PROJECTS

- E-Learning Platform Website May 2025
Sousse, Tunisia
 - Developed a full-stack e-learning platform using PHP & MySQL for course and assignment management.
 - Designed a responsive interface, improving student engagement by 35%.
 - Automated grading workflows, reducing manual review time by 20%.
 - Tech Stack: PHP, MySQL, HTML/CSS, JavaScript
- Mini Project – Student and Library Management System dec 2024
Sousse, Tunisia
 - Developed a Java desktop app using JDBC & MySQL to manage library records and student data.
 - Automated borrowing and returning processes, cutting manual errors by 35%.
 - Designed intuitive dashboards that improved librarian workflow efficiency by 25%.
- Artificial Intelligence Projects Jan 2025 - May 2025
Sousse, Tunisia
 - Improved simulation decision accuracy by 30% using reinforcement learning with Python
 - Integrated Python-based AI modules, enabling faster analysis and more accurate outcomes.
